Summer is never over for some people! **CORO** is a company which is really hung on this belief to keep the party going! Releasing several new product lines of outdoor furniture, CORO challenges the traditional designs time and again, only to find that the great outdoors is something you can really enjoy, even in lush luxury.

For some people, they just can't get enough of summer. It is for this reason, **CORO** released a number of outdoor furniture items designed by some of the finest names in the market.

Divano NEST nuovo

We start with something which is more than just a sofa but a complete seating system. **SABAL** designed by **Matteo Nunziati** not to be a single product but an integrative piece which weaves itself into the visual characteristics of its environment. It's practical because of its dynamic simplicity and alternating with small coffee tables.

The **L3 Sun Lounger** by **Sergio Brioschi** is the ultimate sun tan machine with a small space to stow juices and other beverages while basking in the sensual pleasure of welcoming solar heat. Made out of painted aluminum, the collection is in essence a carefully calibrated geometrical structure giving a good

Jubeae sedia con braccioli cordino acrilico chair with armrest acrylic cord

sense of visual flow, comfortably allowing the user to fully breathe in the serenity of the outside world.

The Nest by Stefano Gallizioli is a sofa which giving the same essence as any interior space yet purely made for the outside. It's kind of like fishing in your own living room, but you're not!

The **Jubeae seats** designed by the **CDC Center** at CORO are also impressively practical when it comes to enjoying the outdoors upholstered with Teflon-covered acrylic cord, the set retains its beauty through its impressive color scheme yet inspirationally minimalist in that it create visual relationship between the outdoor and indoor areas of any household.

CORO was established at the end of 2002 to redefine the way designers make furniture, making living a pure freedom for everyone. Live well and live free. Minimalistic forms make up the new way of living.
